

FT Global Events Buyout and De-Risking Summit

Organised by Financial Times Global Events, the inaugural Buyout and De-risking Conference held Tuesday 19 May 2009 at the London Stock Exchange brought together company finance directors, trustees, consultants, and politicians to explore the full range of buyout and de-risking options. These included full and partial buyouts, buy-ins, longevity insurance, liability driven investment, member inducements, and synthetic buyouts.

The conference provided the pensions industry with an opportunity to explore the pension scheme buyout and de-risking market:

Expert speakers identified options available to schemes, alongside possible future developments. They analysed past deals and highlight potential operational and legal hazards.

Capita's Rosemary Kennell, Director of Capita ATL Pension Trustees Limited & Capita Pension Trustees Limited, was one of the speakers at the conference. Rosemary presented a case study on **A Buyout Deal Step by Step – The View from the Trustee**.
